

EXPERIENCES

Apprenticeship **Dev full stack junior**

01/2022 → 12/2022 NEFTURE (STATION F)

I was the first intern at this young startup that assists brands with their NFT strategies. I left, and now they are nine. I learned to become a versatile Swiss Army knife by mastering Figma, then coding, followed by testing, and analytics. I joined Nefture without any real knowledge of frontend frameworks. They helped me develop my skills in NEXT.js and backend REST APIs. I already had a foot in the web3 world in 2021, but at Nefture, I was able to get hands-on with code and interact with the blockchain by creating mint and stacking websites.

Internship **Dev Front Junior**

05/2021 → 12/2021 MKN MEDIA (SPAIN)

During my 7-month internship, I gained a lot of knowledge about the development world. I initially worked on integrating designs, then fixing CSS and JS bugs. Towards the end, I started working with React, creating small components for the user dashboard of a LinkedIn automation product we were about to launch.

FORMATION

HETIC **Grande École**

2019 → 2022

For me, the strength of HETIC lies in its students who inspire each other to excel. Thanks to the teaching and fellow students, we all have a desire to do many things. Watching other developers inspired me to try new things and take the plunge.

CESACOM **Bachelor in communication**

2016 → 2019

Three years of competing and learning how to create communication strategies across all channels. I learned to design, edit videos, and had some wonderful years.

SKILLS

→ Web Integration

→ Git Versioning

→ Web Development

→ Creacoding

→ Bilingual

→ Video Editing

TOOLS

→ Html / Css / Sass

→ Python / Docker

→ Nextjs / REST / Etherjs

→ Gsap / Framer Motion

PERSO

Electronic music, crypto, gen art, aoe2
